Loaded Shotgun Shells "LEADER"

You can't buy a safer, faster, harder, a more even shooting or a better keeping load than Winchester "Leader" smokeless powder shotgun shells. For field, fowl, or trap shooting, they are in a class by themselves, and give entire satisfaction in any make of shotgun. The results they give are due to their patented construction and the careful and exact manner in which they are loaded. The patented Corrugated Head used on Winchester shells is an invaluable feature. It absorbs the shock of the powder explosion and takes the strain from the paper tube instead of localizing it, as the old English method of metal lining does. That's why "Leader" shells are stronger and less apt to cut off at the mouth than shells made according to English ideas of long ago.

Some Tasks Are Hard and Some Tasks Are Easy For Want Ads .---While Few Indeed Are Impossible!

The easy want ad tasks are usually accomplished through ONE PUBLICATION of the ad. The hard want ad tasks may require REPEATED PUBLICATIONS of the ad-sometimes growing into the dignity of "want ad campaigns."

And, while purely "transient" classified advertising may not complete the task set for it, a "want ad campaign" does not fail, if sensible persistence is used. This means that such difficult went ad tasks as that of finding THE ONE BEST BUYER for your property, or the man who will be glad to invest in your enterprise, or the best possible tenant for that store or business property, are SURE TO BE ACCOMPLISHED if you enter upon suitable want ad campaigns.
